

# Freight Management

## *Leveraged Freight Procurement for the Chemical Industry*

### Understanding

Like you, Agility recognizes that the chemical industry is a dynamic environment where distribution profiles and service requirements are in a state of constant flux as you meet new challenges and opportunities. The wider industry environment also encompasses legislative, technical and market complexity that cannot be ignored. Despite these challenges, the chemical industry needs an efficient, professional, well-informed and agile freight management resource that can continuously develop and deliver safe, cost-effective and service-driven freight solutions.

### Operations Experience

Agility employs teams of Chemical Logistics Specialists with extensive market knowledge, operational expertise and access to a global transactional system. This valuable combination enables Agility to manage outsourced freight procurement and logistics operations for the chemical industry. The scope of services covers bulk and container shipping requirements globally as well as regional services for land logistics. Agility's freight management teams deliver:

- Impartiality Supported by Agency Status
- Dedicated Container & Bulk Shipping Teams
- Land Logistics & Freight Management Systems
- Strategic Supplier Relationships -VIP status
- Critical Focus on Safety Management
- Knowledge & Perspective of Freight Market
- Experience & Expertise in Chemical Logistics
- Total Supply Chain Peace of Mind
- Cost-effective, Practical Freight Solutions

### Leverage

Volumes, route synergies, long-standing industry relationships and Agility's Freight Optimizer system are all leveraged on behalf of our customers to realize cost savings. Regular market reports and Agility's interactive supply chain intelligence dashboards give customers on-line access to current performance metrics and management data to facilitate effective, rational business decision making. Agility's approach to supplier relationship management gives our customers peace of mind knowing that supplier performance is continuously monitored and freight rates are competitive because Agility is continuously in touch with the market.

### A Global Network

With a worldwide network of more than 34,000 employees and 550 offices in 120 countries, Agility helps your business take advantage of our heritage and expertise in the chemicals sector. Customers are also able to leverage Agility's reach as a global logistics partner. We combine our chemical industry-specific knowledge with Agility's global network coverage to provide a truly comprehensive service package.
