

Logistics Solutions

Intimate Involvement for Personalized Solutions

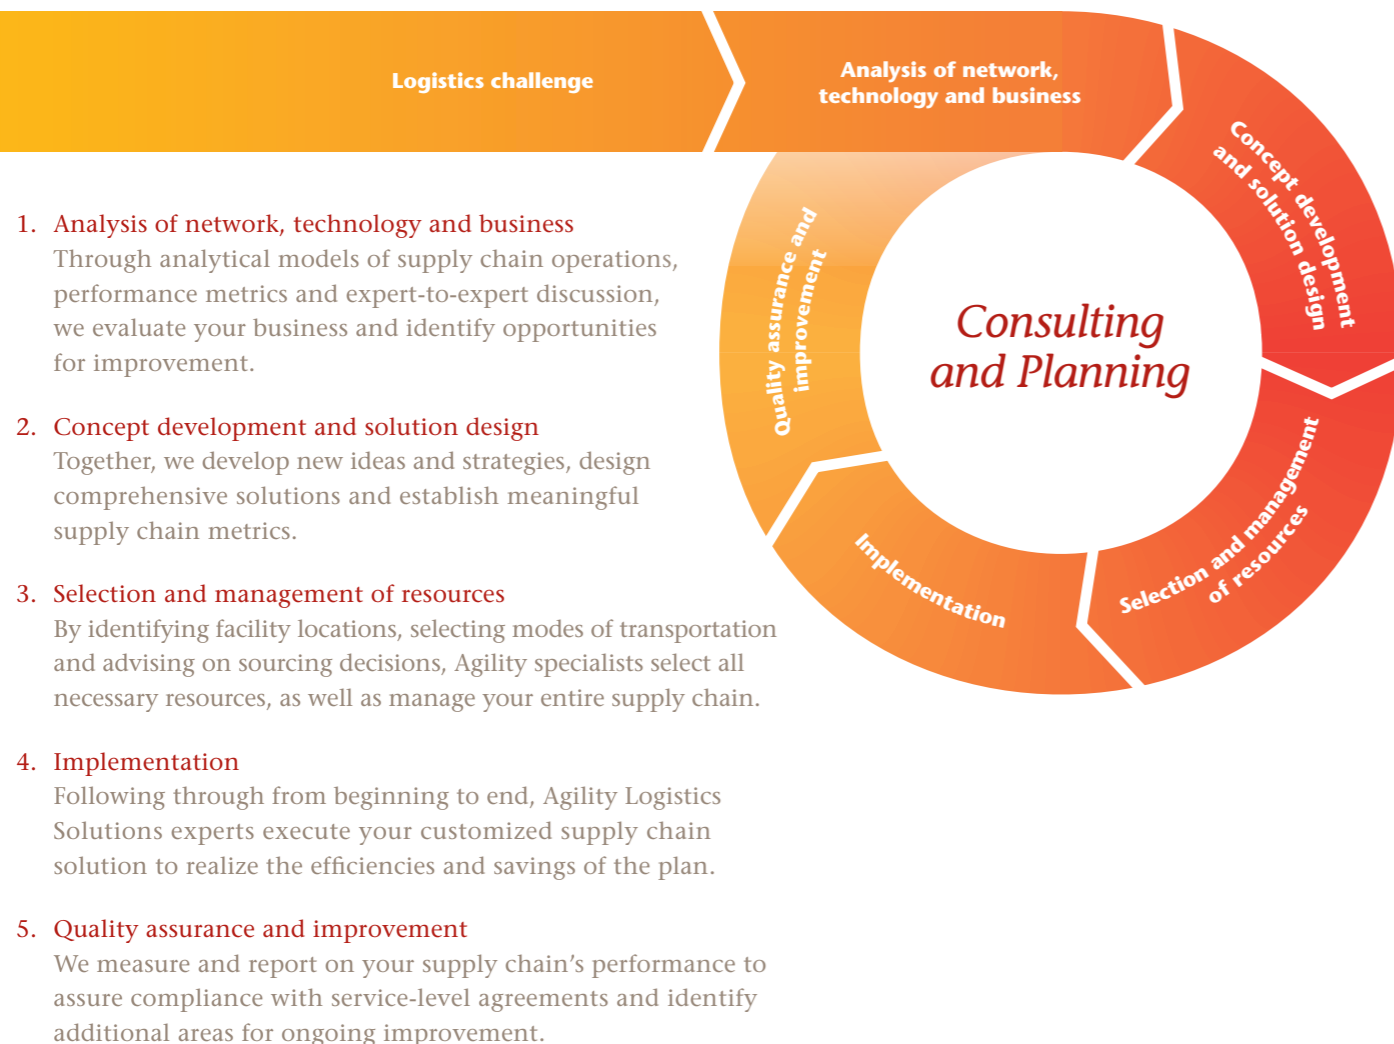

Close Collaboration for Total Understanding

When you have a committed logistics partner planning and implementing a supply chain solution tailored to your specific needs, you have Agility's brand of personal service. As part of Agility's Lead Logistics Concept, our supply chain experts consult with you to understand your business goals and challenges, finding more innovative and cost-effective ways to bring your goods to market. Despite our global scale, we take a high degree of personal responsibility to ensure your success, striving to reduce inventory and supply chain costs, while improving your overall productivity. Our flexible freight forwarding products and specialty businesses—with expertise in specific industries like Project Logistics, Chemicals and Fairs & Events—join with our Logistics Solutions group to form Agility Global Integrated Logistics. Our more than 22,000 employees in over 100 countries take care of you by delivering for your customers.

The Agility Lead Logistics Concept

Strategic Thinking for Real-World Results

While every supply chain is distinct, at Agility, they are all born from the same collaborative process. Agility's Lead Logistics Concept is a systematic approach toward conceiving and executing customized solutions. Supported by our worldwide warehousing, distribution and technological capabilities, our logistics professionals never stop advising, optimizing and searching for new efficiencies. The accountability, competency and ease that come with having Agility as your single, dedicated logistics partner allows you to maintain priorities and focus on your business.

Each phase of our comprehensive process is supported by advanced optimization and simulation tools.

Integrated Logistics Capabilities

The Seamless Flow of Cargo and Information

Agility's logistics experts combine warehousing and distribution, advanced systems and technology, as well as value added services to customize your supply chain to meet your precise goals and requirements. Our dedicated teams select and apply the exact resources you need to improve your business's performance and provide flexibility for a dynamic marketplace.

Scalable Warehousing and Distribution

As the heart and driving force of our successful supply chain solutions, Agility's warehousing and distribution capabilities include full-service management. Backed by Road, Air, Sea and Sea/Air freight forwarding products, advanced technology and strategic facilities, our experts have the resources to put their plans into action. From consulting to overseeing delivery, Agility does not rest until your products reach your customers' hands.

Our scope of management encompasses:

Facility Management

Our facilities are strategically located for ease of reach and equipment access. With flexibility in facility size and type, we are able to select an existing site or set up what you need for optimal proximity.

Inventory Management

We manage end-to-end inventory planning and replenishment tailored to your requirements. Taking complete responsibility for your inventory, we find the efficiencies that eliminate unnecessary stock holding and subsequently decrease logistics cost.

Materials Management

From the acquisition of spare and replacement parts to purchasing, ordering and quality control, we manage the materials and products necessary to keep your business running smoothly.

Advanced Systems and Technology

Agility's tracking and logistics tools pair easy-to-use online systems with sophisticated reporting technology to keep your supply chain visible and manageable in real time. With our Web-based Tracking, your supply chain is always in sight, improving efficiency, planning capabilities and your overall peace of mind. Additionally, our logistics specialists utilize a wide range of advanced applications to view shipment status, manage inventory, schedule actions and monitor security. Agility's state-of-the-art systems provide powerful search, status and performance reporting, so your supply chain moves seamlessly and with optimal control.

Agility tracking and logistics tools offer a broad range of functions:

| | |
|--|--|
| TRACKING | <ul style="list-style-type: none"> Track a single shipment online through Agility's secure, proprietary process, without user IDs and/or passwords. Access basic shipment information and receive updates on significant steps and procedures (<i>receipt of goods, international departure, international arrival, delivery completed</i>). |
| ADVANCED TRACKING | <ul style="list-style-type: none"> Conduct advanced searches for orders and shipments with date ranges, events and multiple references. Generate reports with complete, transparent shipment data. |
| Both tracking applications let you send data in HTML format or as a PDF or Excel file. | |
| SHIPMENT BOOKING | <ul style="list-style-type: none"> Place any shipment order online. Receive customer service-provided confirmations. |
| EXCEPTION MANAGEMENT | <ul style="list-style-type: none"> Set personalized alerts and pre-alerts, via e-mail, on missed, expected and/or confirmed events. |
| CONFIGURABLE REPORTS | <ul style="list-style-type: none"> Create personalized reports by selecting data columns, applying filters and determining the display sequence. |
| DOCUMENT MANAGEMENT | <ul style="list-style-type: none"> Upload and store commercial information/documents with your shipment information, for faster processing of your cargo at destination. Search, download and view documents on any single shipment. |
| INVENTORY & ORDER MANAGEMENT | <ul style="list-style-type: none"> Manage warehouse orders, receipts and inventory via SKU, LOT and on-hold. Review summarized and itemized reports. Manage purchase orders, from single items to a comprehensive booking process, including shipment inventory management, vendor compliance and container utilization. |
| ELECTRONIC DATA INTERCHANGE (EDI) | <ul style="list-style-type: none"> Share information between your systems and ours. Agility's logistics tools provide a number of message formats and standards for seamless communication among networks. |

Value Added Services

With a comprehensive range of Value Added Services at their disposal, Agility's logistics experts match their selections with your specific business requirements. Whether we are performing light product assembly on-site or determining which packaging materials are reusable upon delivery, Agility covers the before, the after, and the in-between.

Our Value Added Services include:

| | |
|-------------------------------------|---|
| Pre-Shipment Services | With pick and pack, shrink-wrapping and slip-sheeting, we can prepare your cargo for transport. |
| Postponement Manufacturing Services | Whether it's blending, kitting and grinding; metering and sorting; or bundling and labeling, we ensure your products meet your customers' expectations. |
| Configuration and Assembly Services | To help you reduce transportation costs, we can handle your configuration, testing and installation needs. |
| Supervision Services | Providing quality and quantity control, along with inspection and verification, we confirm that products are in the proper condition every step of the way. |
| After Sales Service | To simplify product exchange, we can incorporate reverse logistics, service parts logistics or exchange logistics into your supply chain. |

Individual Supply Chain Solutions for a Changing World

With Agility's extensive experience and vast resources spanning numerous industries and countries, our experts are able to customize distinctive supply chain solutions for your specific business needs. Using a proven and scalable process and drawing from our large network of people, we can combine our freight forwarding products, Specialty businesses and logistics expertise to create solutions that accommodate the most dynamic and category-specific markets. Whether you require a Direct-to-Store, Vendor Managed Inventory and Origin Cargo Management solution, or an entirely customized approach, we provide the right process, equipment and tools as well as the personal attention to move your supply chain efficiently and cost-effectively.

Agility's commercial business, Global Integrated Logistics (GIL), is headquartered in Switzerland. Agility GIL provides supply chain solutions to meet complex and traditional customer needs. GIL offers air, sea and road freight forwarding, warehousing, distribution and specialized services in project logistics, fairs and events, fuels and chemicals.

Agility's unique collection of portfolio businesses includes Agility Defense & Government Services, a logistics provider to governments, ministries of defense and international organizations. Agility's Infrastructure group of companies manages commercial and industrial real estate and offers solutions in customs optimization and clearance, waste management and recycling, aviation services, remote infrastructure and life support.
