

Government Contractor Services

Origin: United States, Destination: Global Delivery

A Trusted Partnership

When trading on behalf of the government, contractors must source from many U.S. locations, and ensure that materials are delivered to our Consolidated Receiving Points (CRP) for monitored and secure crating, packing and inspection. The Special Security Agreement (SSA) with the Department of State means our teams have gone through rigorous security checks and training. Whether it is the construction of a secure Embassy located in a remote region of the world, providing contractors with logistics services for the vital equipment used in ongoing U.S. military operations, or emergency relief shipments – our expertise assures efficient and cost effective solutions specially designed to transport government contractor cargo around the world.

Focused Expertise

Using our in-depth knowledge and experience, Agility provides customers with global and on-site management for even the most complex, stringent and time-sensitive cargo movements. Our industry-leading services include:

- Secure Project Management Plans
- Secret or Top Secret Security Clearance
- 20 Years Working with CRP Secure Cargo
- Warehousing, Export Packing and Staging
- Cargo Escort Services
- US Flag Cargo Preference Compliance
- Line Item Tracking over Secure Network
- Customs Clearance
- Camp Management and Catering Services
- Threat Management Services

Peace of Mind

U.S. government contractors benefit from the extensive training and dedication of our professional staff members who are part of one of the largest international freight management companies in the world. Agility's proven track record means your cargo will be delivered to the appointed destination. Even for the most critical jobs, you can count on practical solutions that assure your government contractor freight arrives secure and on time. Agility's unique combination of experience, excellence, and innovation leads to peace of mind for our customers around the world.

Commitment to Customers

For over 25 years our personalized service and expertise have reduced customer costs by applying Agility's strategic procurement and operational experience. Our company is committed to total compliance covering Ethical Business Practices; Health, Safety and Environmental concerns; Foreign Corrupt Practices Act regulations; as well as Hazardous and Emergency Preparedness training. Through the experience of our international team, we at Agility Project Logistics are constantly striving to raise the standards of excellence for our industry. From the people of Agility to our strategically located offices, we are focused on a commitment to customers.
