

Industry Solutions Aerospace Logistics

Dependable Time Critical Services to the Aerospace Industry

The demands of the Aerospace industry require a reliable partner who can be trusted to deliver on-time, every time and within budget. Whether you are moving complete engines, landing gear, wings, nacelles, wheels, spare parts or any other component part, aerospace companies need multiple shipment options and charter services worldwide.

Effective aerospace logistics begins with Standard Operating Procedures and Key Performance Indicators based on your specific requirements. Appropriate customs regimes are needed ensure optimum value to your organization. Comprehensive Freight & Warehouse management systems are also a cornerstone, interfacing with your own systems to ensure end-to-end visibility of your shipments throughout the supply chain.

Customized Solutions with Three Tiers of Service

Although our services are customized to your needs, we offer three service levels for aerospace logistics: Value, Premier, and Expedited. Value is intended for non-emergency work, such as supply stores and spare parts; provided at competitive and economical pricing. This includes dangerous goods and heavy weight shipments. Premier is provided for express "hot" pickup from origin with the fastest transit and shortest handling times so cargo is available with cost-effective priority transportation. Our Expedited service uses express delivery on the next flight out, with immediate customs clearance for situations like an Aircraft on Ground (AOG) where time is a luxury.

World Class Aviation & Aerospace Partners

As a business partner, we manage the transportation and distribution of aircraft parts worldwide through numerous logistics centers. Agility's Aviation & Aerospace Team is recognized by airlines, leasing organizations, aircraft engine manufacturers, overhaul and repair shops, and specialist subcontractors as a market leader in the transportation and handling of aircraft logistics.

We are truly a global organization, incorporating state-of-the-art systems and communications networks. In addition, Agility's Aerospace services come with Agility's brand of personal service, global network with local insight, and end-to-end supply chain logistics management. We are driven to provide safe, economical and effective movement of aircraft parts to support your business.

Helping our Customers Succeed

"The business plan we use at Vector is nice to see also at Agility; a prompt response to inquiries, a "make it work" attitude, followed by a competitive quote."

- Rod Youngberg
Vector Aerospace Helicopter Services

"Agility Logistics is a leader in providing a broad range of services and support to meet [the aviation industry's] high demands."

- Sherry Riley
GE CAS Engine Leasing

Agility Aerospace Logistics Experts

When you have a dedicated team of logistics professionals studying your business, listening to your concerns and understanding your challenges, you have Agility's brand of Personal Service. Partnership with our customers is the driving force behind our mutual success and the ultimate satisfaction for our more than 34,000 employees in over 120 countries around the world.

As a top global service provider, we do business in the most straightforward scenarios, as well as the world's most challenging environments. Agility is a company on the move, yet we never lose sight of the fact that whether you are a small or large enterprise, the heart of our business is personal customer service.

Key Features for the Aerospace Industry

- 24 hour AOG Desk for expedited needs
- Value, Premier, and Expedited Services
- Reliable, Punctual, Adaptable
- EDI System Integration
- Agility's Online Freight Management System
- Repair Cycle Management
- Consolidation Services Available
- Storage/Warehousing Capability
